

MARIDAV LAYERMAX 5% & BROILERMAX 20% CONCENTRATES

Maridav Ghana Limited is a leading supplier of top-quality nutrition and health products. Incorporated in 1987 and with over 3 decades of service supporting various stakeholders in the food and feed value chain. Maridav is your partner of choice. Maridav is the local representative and distributor for leading global brands in nutrition and animal health such as; DSM Nutritional Products, BIOMIN GmbH, Zoetis, CID Lines.

Maridav is your one stop source for all your animal nutrition and health product needs. We provide a comprehensive range of poultry drugs, feed additives, hygiene products and poultry feed concentrates.

POULTRY FEED

Feed constitutes averagely 70% of the poultry farmer's cost of production. Our focus as a company is to offer the farmer the most effective products for your feed preparation to minimize cost and maximize profit. There however is a tall list of additives and feed ingredients that go into feed preparation. A lot of time and effort can be spent in sourcing all these inputs from various suppliers and in ensuring they are mixed in the right proportions. With very few qualified nutritionists available, solid advice and support on feed formulation is not readily available for most poultry farmers.

Poultry feed concentrates provide much needed convenience to poultry farmers by delivering all key micronutrients in one pack to simplify the feed preparation process and reduce the time, money and effort used in sourcing a broad number of inputs from various suppliers.

LAYERMAX & BROILERMAX CONCENTRATES

LAYERMAX 5% & BROILERMAX 20% Concentrates are carefully formulated high-end concentrates that deliver the right nutrition layers and broilers need for growth and maximum performance. They contain high levels of all the feed additives that Maridav supplies from the leading global brands including Carophyll (a trademark product of DSM, added to the LAYERMAX 5% Concentrate as standard component to guarantee an excellent yellow yolk colour in your eggs) and are backed by sound technical support from our foreign principals.

LAYERMAX and BROILERMAX concentrates come with a guarantee of optimum performance owing to their high nutritional value, superior quality composition and formulations designed to provide the best return on your investment. All the nutritional needs of your birds are catered for in our formulation and accompanying mixing directions ensuring that you do not need to go beyond them to top up your feed with additional amino acids, vitamins and minerals, phosphates, enzymes or carotenoids to improve performance.

Layermax & Broilermax provide:

1. Superior quality
2. Optimum performance
3. Competitive pricing
4. Improved feed quality
5. Lower feed cost
6. High levels of Carophyll for optimum yolk colour in Layermax 5% Concentrate and
7. Maximum returns

Each Bag of Layermax & Broilermax Contains

Optimal levels of:

Protein
Vitamins & Trace Minerals
Vitamin A
Vitamin D3
Vitamin K3
Vitamin B2
Niacin
Pantothenic Acid
Folic Acid
Choline Chloride
Manganese
Iron
Zinc

Selenium
Sodium

Chloride
Phosphorus
Calcium
Antioxidant
Amino Acids
Methionine
Lysine
Threonine
Valine
Ronozyme Enzymes
Ronozyme HiPhos (Phytase)
Ronozyme WX (Xylanases and Beta-Glucanases)
Ronozyme VP (Xyloglucanase and Pectinase)
Carophyll (In the Layermax 5% Concentrate)
Carophyll Yellow
Carophyll Red
Mycotoxin Binders (Mycofix)

NIR Analysis

Our Laboratory is equipped with a state of the art Near Infrared (NIR) analyzer. Clients who use our concentrate can be provided with analysis of their feed and feed ingredients (maize, soya bean meal, wheat bran and fish meal) free of charge. Analytical results for samples delivered to our Laboratory in Tema Heavy Industrial Area can be available by the following working day.

Mixing Directions

CHICK STARTER - WEEK 1-6	
Ingredient	Quantity/Kg
SBM 47% CP	310
DCP	7.2
Methionine	0.8
Maize	580
Wheat bran	44
Oyster shells	8
LAYERMAX 5%	50
	1000

CHICK GROWER - WEEK 7-11	
Ingredient	Quantity/Kg
SBM 47% CP	250
DCP	3.5
Methionine	0.50
Maize	525
Wheat bran	160
Oyster shells	11
LAYERMAX 5%	50
	1000

PULLET - WEEK 12-15	
Ingredient	Quantity/Kg
SBM 47% CP	140
Maize	462
Wheat bran	335
Oyster shells	13
LAYERMAX 5%	50
	1000

PRE-LAY - WEEK 16-19	
Ingredient	Quantity/Kg
Soya 47% CP	185
DCP	5
Maize	510
Wheat bran	200
Oyster shells	50
LAYERMAX 5%	50
	1000

LAYER MASH - WEEK 20 & ABOVE	
Ingredient	Quantity/Kg
SBM 47% CP	180
Maize	520
Wheat bran	150
Oyster shells	100
LAYERMAX 5%	50
	1000

LAYER MASH - WEEK 20 & ABOVE	
Ingredient	Quantity/Kg
SBM 46% CP	185
Maize	520
Wheat bran	145
Oyster shells	100
LAYERMAX 5%	50
	1000

LAYER MASH - WEEK 20 & ABOVE	
Ingredient	Quantity/Kg
SBM 45% CP	190
Maize	520
Wheat bran	140
Oyster shells	100
LAYERMAX 5%	50
	1000

BROILER-STARTER - WEEK 1-3	
Ingredient	Quantity/Kg
SBM 46%-47% CP	225
DCP	2.3
Lysine HCL	0.70
Wheat bran	32
Maize	540
BROILERMAX 20%	200
TOTAL	1000

BROILER-GROWER - WEEK 4-6	
Ingredient	Quantity/Kg
SBM 46%-47% CP	205
Maize	595
BROILERMAX 20%	200
TOTAL	1000

BROILER - FINISHER - WEEK 7-8	
Ingredient	Quantity/Kg
SBM 46%-47% CP	150
Maize	650
BROILERMAX 20%	200
TOTAL	1000
